

— Let's Work Together to Create a Recycling-based Society —

# Fukuoka Research Commercialization Center for Recycling Systems

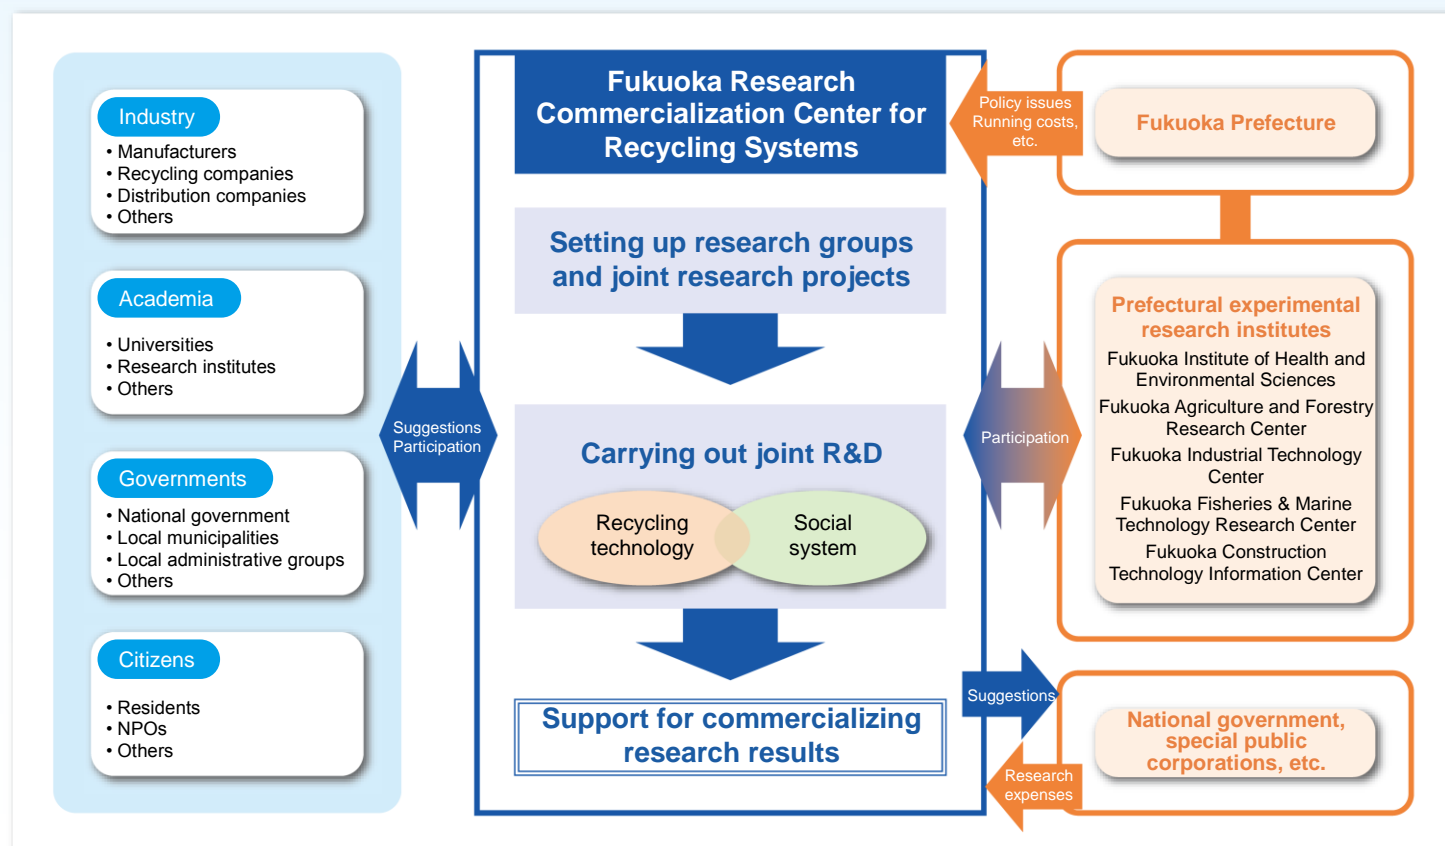

To implement new recycling systems in our communities as part of building a recycling-oriented society, a variety of issues in designing new social systems, such as waste collection and establishment of new sales channels, should be discussed simultaneously while technical development is being promoted.

The Fukuoka Research Commercialization Center for Recycling Systems is a government policy-promotion research institute that makes comprehensive efforts to overcome these issues. We help industries, academic institutions, governments, and citizens conduct joint researches smoothly and commercialize the research results.

## Roles of the center

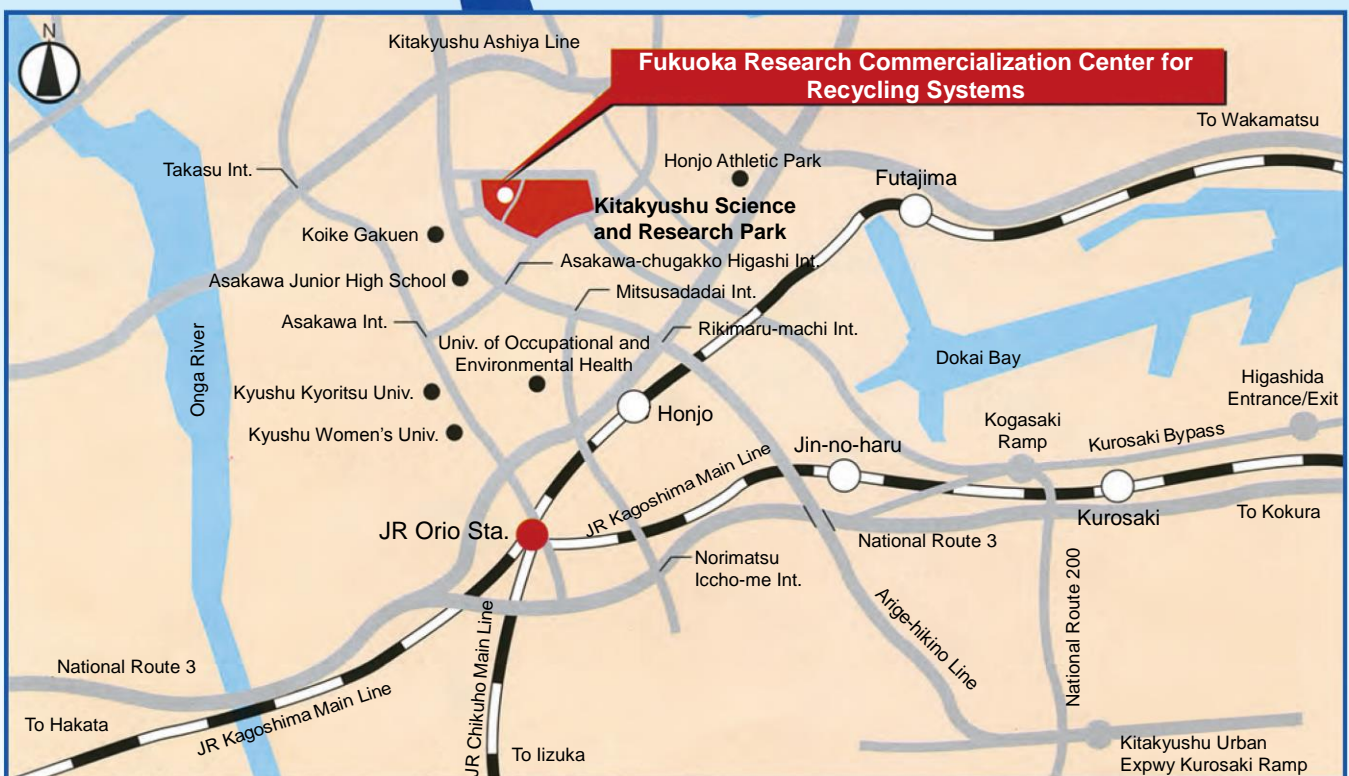

- Promote research and development to build social systems, such as recycling systems and waste collection, based on the properties of each type of waste. The research and development are conducted jointly among industries, academic institutions, governments, and citizens.
- Support the commercialization and dissemination of the research results to local communities. If researchers need to be provided with a verification facility to conduct a joint project, they can use our verification test site in Kitakyushu Eco-Town.
- Publicize information on the environment and recycling, such as posting research results on our website and in other media.

### Access

- ◎ Get off at JR Orio Station  
Take a Kitakyushu City Bus (for Gakken-toshi) from Orio-eki Nishi-guchi to Gakken-toshi Hibikino (approx. 15 min.)
- ◎ Take a taxi from JR Orio Station (approx. 10 min.)
- ◎ Kurosaki Ramp of Kitakyushu Urban Expwy  
Take the Orio exit (approx. 20 min.)

Ecoton is the official mascot of Fukuoka Prefecture.

If you have any opinions or proposals regarding our projects and joint researches, please contact:
